

INNO[®]POD

Design: Anders Nørgaard / Concept: Four Design

Description:

Inno[®]Pod is developed based on the physical and psychological challenges that we meet in modern work and study facilities. For Four Design the challenge has been to create a room that reduces noise, creates tranquility, improves mobility, and reduces the activity in our natural center of fear (amygdala), enabling the ability to concentrate everywhere.

Inno[®]Pod is mobile and easily moved and linked together with other Inno[®]Pods, when group work is the best working method. Inno[®]Pod is perfect for large spaces, walking areas, where you need a Touch down workplace, or for peace to work in open-plan offices.

ISO14001:

We are aware of our environmental responsibilities. We strive towards a minimal burden in the internal and external environment. The internal environment is evaluated through a careful examination of components and materials used in the production manufacturing processes. The external environment is monitored through laws and regulations.

It is important to Four Design that our suppliers abide to the environmental laws regarding production and handling of waste materials. It is our goal to always use environmentally friendly raw materials.

Four Design A/S can document our commitment to the environment.

We have been awarded the Miljøforum Fyn's Environment Diploma and obtained the ISO14001 certificate in 2011.

Recycling:

General: The Inno[®]Pod can be separated into parts.

Metal parts: can be disposed and recycled by an approved environment and raw materials organization. Lacquered frames are treated with a paint classified as not dangerous according to directive 1999/45/EF.

Upholstery: Foam: can be recycled and reused for new foam products.

Upholstery is not recyclable, must be disposed of in the incinerator.

Maintenance:

We kindly refer to our Maintenance Guide.
