

Titan Task Chair

Practical and functional, the anatomically curved backrest sits upright and captures natural spinal curvature, supporting you in upright and reclining positions. With a height adjustable moulded foam lumbar, it allows custom support to your lumbar region.

Continuous flowing movement of the Synchro mechanism, encourages healthy sitting and lessens pressure to the thighs and lower spine. Adjustable 3D armrests are integrated into the back frame and move with the user.

The guiding principles of flexibility, comfort and user-friendly adjustability are evident with the VX6.

Features

- Heavy duty synchro mechanism
- Seat Slide function
- Height adjustable moulded foam lumbar support
- Fire retardant mesh backrest
- 3D Armrests
- High density moulded foam
- ANSI/BIFMA approved X5.1-2011
- Weight rated to 135KG

Options

- 4D Headrest
