

MAS

K.I.D is having a moment with biophilic design - well, a very long moment, the kind that never really ends. Available in dual-colour options, the MAS planter is designed to act as a green wayfinding device or to offer privacy for desk users when placed at the end of a workstation cluster. Made entirely from mild steel, it is durable, fully recyclable, and comes complete with a removable mulch cover and a galvanised drip tray.

Lead time: 6 weeks

Origin: NSW
